router, API, Projetos)

# Matheus Finatto

Software Developer at Wonder Sistemas  
Erechim, Rio Grande do Sul, Brazil

## Summary

Hello, my name is Matheus Finatto!

I am a web developer with some experience working with React.

I am also a Computer Science student, currently in my 5th out of 8 semesters, and hold a Bachelor's degree in Business Administration. I have an advanced level of English. My main focus is on React development, but I am always excited to learn new things!

On my GitHub profile, you can see some of my personal projects, such as a movie library using React and the TMDB API, a responsive website made with HTML and CSS, and a game library that uses the IGDB API and was developed in collaboration with three other students on a college project. (Visit: <https://github.com/MatheusFinatto> to see much more!)

In addition to React, some of my favorite technologies include TypeScript, JavaScript, HTML5, CSS3, Python, Node.js, Express.js, and Flask.

If you want to know more about me, feel free to get in touch!

## Experience

Wonder Sistemas  
Software Developer  
October 2022 - Present (8 months)  
Erechim, Rio Grande do Sul, Brasil

As a web tools developer for an ERP software, I specialize in utilizing cutting-edge technologies such as React, GraphQL, Apollo GraphQL, and Ant Design.

My key responsibilities include:

- Designing and implementing web-based solutions that seamlessly integrate with our ERP system
- Collaborating with cross-functional teams
- Utilizing React and Ant Design to develop intuitive and responsive user interfaces that enhance user experience
- Leveraging GraphQL and Apollo GraphQL to develop efficient and reliable data-driven applications that improve system performance
