EXPERIENCE

Front-End Software Developer

April 2022 – Present

Wonder Sistemas

Erechim, RS

- Built end-to-end expense management system serving dozens of partner companies managing hundreds of monthly expenses. Integrated AWS Textract AI service for automatic form filling from document photos, eliminating over 80% of manual errors.
- Designed and implemented order approval system with workflow stages, reducing processing time by 50% and errors by 20% through interface optimization and usability improvements.
- Built digital signature system for delivery personnel, eliminating paper usage, preventing human errors, and increasing security and traceability of deliveries.
- Developed production order tracking system with QR code/barcode scanning via mobile camera, reducing manual errors by 20% and dramatically increasing operational efficiency.
- Co-authored Design System project to create and standardize reusable components and custom hooks, drastically reducing implementation time of new features.
- Performed code maintenance and fixes, improving performance, readability, and maintainability.

Chatbot Take Blip Scholarship

Dec. 2021 – Mar. 2022

Compass UOL

Erechim, RS

- Created intelligent and interactive chatbots both autonomously and in collaboration with team, gaining practical experience in JavaScript, Node.js, Blip, IBM Watson Assistant, and related technologies.
- Participated in training on backend and chatbot development, enhancing knowledge in software architectures, API integration, and conversational flows.
